Professional Summary

Experienced Software Development professional with a strong background in designing, developing, and optimizing web-based solutions. Proven ability to lead cross-functional teams, implement process improvements, and deliver high-quality projects on time. **Adept at combining technical expertise with leadership to drive efficiency and innovation.**

Skills

- | | | |
|-------------------------|-----------------------|-------------------|
| ✓ Software architecture | ✓ Code quality review | ✓ Leadership |
| ✓ Web development | ✓ Agile planning | ✓ Problem-solving |
| ✓ API integration | ✓ Process automation | ✓ Communication |
| ✓ Database optimization | ✓ Performance tuning | ✓ Collaboration |

Other Technical Skills & Tools

.NET / C# / VB | JavaScript | Oracle PL/SQL | Git | GitHub | SVN (Subversion) | Team Foundation Version Control (TFVC) | Azure DevOps CI/CD pipelines | CSS | HTML | NPM | JIRA | System troubleshooting | Data migration | System integration | Debugging

Work History

Senior IT Project Consultant | Jan 2024 – Present

Insurance Technology S.A, Chile

- Lead the planning, coordination, and execution of an international software implementation project for Everest (insurance industry), managing scope, requirements, resources, and stakeholder communication.
- Led a multicultural team of 11 professionals, optimizing collaboration and productivity.
- Automated all policy issuance processes through bulk data uploads, reducing processing time.
- Increased team capacity by 50% through process improvements and resource optimization.
- Achieved on-time deployment in Mexico and Colombia within one year, meeting all operational requirements, and secured client commitment for the upcoming Peru project in 2026.

Technical Lead / Software Engineer | Jan 2018 – Dec 2023

Insurance Technology S.A, Chile

- Managed the design, development, and optimization of software solutions, overseeing system enhancements, process automation, security improvements, and cross-team technical initiatives to ensure high-quality, on-time project delivery.
- Oversaw the development of custom and bulk processing solutions for insurance operations, including Oracle PL/SQL-based workflows.
- Managed and enhanced the VisualTime system, improving performance, usability, and user experience.
- Introduced a SCRUM-based methodology adopted company-wide, improving delivery consistency and efficiency.
- Standardized programming practices using Azure DevOps and GitHub across all development teams.
- Implemented security measures for web applications and led technology upgrades for servers and database engines.
- Coordinated agile sprint planning, system upgrades, and post-implementation improvements to critical processes.
- Delivered releases with a 0% rejection rate from QA and clients while acting as the primary technical liaison, ensuring clear requirement definition and driving continuous improvement initiatives.
- Provided mentorship and cross-team technical support, contributing to project stability and knowledge sharing.

Education

Bachelor's Degree in Computer Engineering – Universidad Tecnológica de Chile INACAP, Chile - 2014
